Does $\sum_{n=1}^{\infty} \frac{e^e}{2^n}$ diverge, converge absolutely, or converge conditionally?

Solution

Solution
$$\sum_{n=1}^{\infty} \frac{e^e}{2^n}$$
 is a geometric series with $r = \frac{1}{2}$. Since $|r| < 1$, the series $\sum_{n=1}^{\infty} \frac{e^e}{2^n}$ converges by the Geometric Series Test.

Since
$$\sum |a_n| = \sum a_n$$
, the series $\sum_{n=1}^{\infty} \frac{e^e}{2^n}$ converges absolutely.
